FOR IMMEDIATE RELEASE

December 11, 2017

Subject: Start of Commercial Operation of First Underground Hydrocarbon Storage Project in Mexico

Southport, Connecticut.

On December 5, Cydsa, S.A.B de C.V. (“Cydsa”) announced that its subsidiary Almacенamientos Subterráneos del Sureste (“ASSSA”) successfully began operations of its underground salt cavern hydrocarbons storage business with the commencement of commercial operation of its first storage facility, located near Coatzacoalcos, Veracruz. ASSSA and Petróleos Mexicanos entered into an agreement relating to the facility in November 2014 providing for underground storage of 1.8 million barrels of liquefied petroleum gas (“LPG”) with an injection and extraction capacity of 120,000 barrels per day.

SalTec International, Inc. (“SalTec”) and Cydsa have an exclusive agreement for the development of hydrocarbon and waste storage projects in Mexico, and the facility represents the first commercial project developed under the SalTec-Cydsa agreement.

Reform of the Mexican energy industry is currently being implemented by the Energy Secretariat and is expected to encourage other developments of this type around the country, based on the need to increase inventories of different types of hydrocarbons. Cydsa anticipates continuing growth in underground storage projects for hydrocarbons to contribute to the efficient and safe operation of the country's industrial and energy sectors.

Storage of hydrocarbons in salt caverns is considered the safest and the lowest cost option to store large volumes of LPG and other hydrocarbons (including, without limitation, crude oil and its mixtures, natural gas, gasoline, diesel, fuel oil, ethanol and hydrogen) and is widely used in Europe, the United States and other industrialized countries.

Questions concerning this release should be directed to Lawrence Kelly at (203) 255-8777.

About Cydsa, S.A.B. de C.V.

Cydsa, headquartered in Monterrey, Mexico, is one of Mexico's leading industrial companies with operations in salt, chemicals, plastics, yarns and textiles. Cydsa has over 1,700 employees, with 2016 sales of US\$372 million and EBITDA of US\$81 million. Cydsa has more than 20 subsidiaries located in eight Mexican cities and serves customers in more than 15 countries. Cydsa trades on the Mexican Stock Exchange under the symbol “CYDSASA”.

About SalTec International, Inc.

SalTec International, Inc., a Delaware corporation (“SalTec” or the “Company”), with offices in Austin, Texas and Southport, Connecticut, is a growth-oriented project development company dedicated to owning and operating midstream energy infrastructure assets in the United States and Mexico, with a current focus on the use of solution-mined caverns in salt formations for hydrocarbon storage and waste management.
